

Bright Futures Nursery and Kids Club

NEWSLETTER APRIL 2016

BREAKING NEWS

We have an exciting new project at Bright Futures Nursery!

We are going to transform the garden in front of the buggy shed into a Nature Garden. At present moment it is rarely used, but when finished, it will be used constantly. We will show you, through the newsletters, the development of the garden.

Check out the **Before Pictures**:

The Garden will be a haven for birds, insects and children, full of plants, real grass and natural objects to play with and explore. The Garden will also include an area to grow herbs and vegetables and a compost bin.

The Area will be of great benefit for the children's health, development and well-being, and will provide lots of learning and communication opportunities.

We would be very grateful if you could help us achieve our goal by offering ideas, assistance, tools, plants, etc.
