

Little Rainbow Nursery

Procedure for Applying Sun-Cream

- Ensure your hands are washed and dried.
- Before going into the garden all children must be sitting in the book corner.
- A child is called one-by-one
- Choose the correct sun cream for the child. i.e. apply the sun cream that the child has bought in from home, as the child may be allergic to certain ingredients. If the child does not have their own sun cream then apply the cream provided by the nursery.
- Apply the cream to the hand and spread it onto the parts of the body which are uncovered. i.e. arms, legs, neck.
- Carefully apply the sun-cream to the face avoiding contact with eyes.
- Use tissue to wipe clean your hands.
- Get the child to line up, once you have applied the cream, in this way you are able to identify the children that have not had sun cream applied.
- Follow the above procedure again.
- Ensure that all children have hats on.
